The screenshot displays the OWASP ZAP 2.11.0 interface. The top menu bar includes File, Edit, View, Analyse, Report, Tools, Import, Online, and Help. The left sidebar shows a tree view with Sites, Contexts, and a list of sites including https://firefox-settings-attachments.cdn.mozilla.net, https://content-signature-2.cdn.mozilla.net, https://firefox.settings.services.mozilla.com, and http://127.0.0.1:8000. The main pane shows a POST request to http://127.0.0.1:8000/page/login. The request body contains a SQL injection payload: `email' or username is not NULL or username = 'password=1' and 1=(select count(*) from tablename); --`. The bottom pane shows a table of fuzzed messages.
